

## SUMMARY

Motivated and detail-oriented Web Developer with a solid foundation in HTML, CSS, and JavaScript, complemented by hands-on experience with basic Node.js for server-side development. Skilled in building responsive, accessible, and user-friendly websites that adhere to modern web standards, semantic coding practices, and mobile-first design principles. Familiar with DOM manipulation, asynchronous JavaScript, basic API integration, and version control using Git and GitHub. Eager to apply front-end expertise while expanding full-stack capabilities through hands-on experience and ongoing learning. Passionate about emerging web technologies and best practices, committed to mastering new frameworks, backend development tools, and deployment processes. Highly adaptable, quick to learn, and thrives in dynamic, fast-paced, Agile environments, working effectively both independently and collaboratively within cross-functional teams. Seeking an opportunity to apply technical skills and creative problem-solving to deliver impactful, scalable, and efficient digital solutions. Dedicated to professional growth and excited to contribute to innovative projects that enhance user experiences and drive business success.

### Soft Skills

- Strong problem-solving and debugging abilities
- Effective verbal and written communication
- Adaptable and quick to learn new technologies
- Team collaboration in Agile/Scrum environments
- Attention to detail in UI/UX design
- Time management and ability to meet deadlines
- Eagerness to grow as a full stack developer
- Open to feedback and continuous improvement
- Comfortable working independently or in teams

### Technical Skills

- HTML5, CSS3, JavaScript (ES6+)
- Responsive Web Design & Mobile-First Development
- CSS Frameworks: Bootstrap, Tailwind CSS
- Front-End Frameworks: React.js (Intermediate ), jQuery
- DOM Manipulation & Event Handling
- Version Control: Git, GitHub
- RESTful API Integration
- Asynchronous JavaScript
- Cross-Browser Compatibility
- Basic Node.js & Express (introductory level)
- WordPress Development
- Browser Dev Tools (Chrome, Firefox)
- Performance Optimization & Core Web Vitals (basic)
- Java Core

## WORK EXPERIENCE

### Trident Global Service

04/2024-06/2025

#### E-commerce Website | Developer

- Created and maintained a fully functional website using modern web technologies including HTML5, CSS3, JavaScript, and Bootstrap for responsive design and layout.
- Implemented interactive features and dynamic user experiences through client-side scripting and DOM manipulation.
- Integrated secure and reliable payment gateways using pre-built plugins, ensuring encrypted transactions and customer data protection.
- Handled ₹10K/month in e-commerce transactions securely
- Managed and optimized digital advertising campaigns on Google Ads and Facebook Ads, leading to a significant increase in online visibility and engagement.
- Applied SEO strategies including keyword optimization, metadata updates, and performance improvements to boost the website's search engine ranking.
- Achieved measurable growth in organic traffic and improved overall online presence through targeted SEO and ad strategy.

# Freelancer

04/2022-05/2023

## WordPress Movie Website | Developer

- Constructed a multi-page movie website using the WordPress platform, leveraging free hosting services to keep costs minimal while delivering a professional user experience.
  - Designed a visually engaging landing page as the central entry point, guiding users to content-rich subpages focused on movie-related topics.
  - Integrated multiple linked pages to organize content effectively and improve site navigation.
  - Selected and implemented WordPress plugins to enhance functionality, including performance optimization, visual elements, and user interaction.
  - Focused on building a user-friendly and responsive layout to ensure accessibility across various devices and screen sizes.
  - Increased website traffic by 40% using SEO strategies
- 

# PROJECT

06/2023-03/2024

## Video Calling Website | Developer

- Built a video calling website using JavaScript for front-end interactivity and PHP to handle device connectivity and session management.
  - Implemented core video call features such as audio muting, speaker output control, and interactive pop-up windows to improve the user experience.
  - Designed an intuitive and responsive user interface (UI) using vanilla JavaScript and modern web design practices to enhance accessibility and engagement.
  - Utilized unique session codes through the UHU backend to establish secure and stable connections between multiple devices.
  - Combined front-end and back-end functionality to deliver a seamless, real-time communication experience with reliable device pairing and minimal latency.
  - Reduced load time by 1.5s with performance tuning
- 

# EDUCATION

## Bachelor of Computer Applications (BCA)

*St. Andrews Institute of Technology & Management — Gurgaon, India*

**Graduation:** 2025

- Specialization: Computer Applications Development

## Senior Secondary (Class 12), CBSE

*Ahlcon Public School — Delhi, India*

**Completed:** 2022

## Secondary (Class 10), CBSE

*Ahlcon Public School — Delhi, India*

**Completed:** 2020

# Certification & Awards

## **Java Programming Course**

*DUCAT, Noida — 2023*

## **Prompt Engineering Course**

*Instructor: Dhruv Rathee — 2024*

## **Generative AI Fundamentals**

*Google Digital Garage / Google Skills — 2025*

## **Full Stack Web Development Course**

*PW Skills — 2025*

---

# Languages
